WHO ARE WE:

HackOverflow is an annual collegiate Hardware Hackathon that provides students from all backgrounds and interests with a fun opportunity to learn, collaborate in teams, and build physical product prototypes of what could be the next big thing.

WHY HACKOVERFLOW?

The purpose of HackOverflow is to create a diverse environment where students can work hands-on with society-impactful projects and attain technical skills applicable for future careers.

There is ample opportunity to network with peers, mentors, and industry experts. Our goal is to showcase the brilliance of tech and its powers to do wonders for society.

THE TALENT PIPELINE:

11,000

enrolled undergrad & grad students in the College of Engineering & Computing

100+

students who participated in HackOverflow in 2022

154

followers on our Instagram!

Why Sponsor?

This Fall, GMU will be hosting its second iteration of the first of its kind premiere Hardware Hackathon, HackOverflow!

Our hope is to provide students with the growing desire to invest in problem solving and innovation for their communities.

We need your help to provide students with the opportunity to work on projects, such as reconfiguring circuits, constructing an app-controllable robotic arm for studying, and to simply enjoy hands on learning.

From increasing brand awareness to possible recruiting opportunities at the largest university in Northern Virginia and neighboring academic institutes, we hope

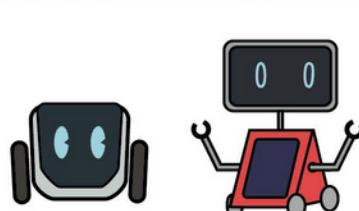

you consider a sponsorship with us. Our students have so much to offer you.
